

Trovita Health Science – Makers of ENU® Complete Nutrition Shakes – Partially Closes New Growth Financing through CircleUp

Additional Investment Capital Secured to Fuel Expansion and Launch Innovative Delivery System and Nutrition Combination for Tube Feeding

Minneapolis, MN – December 7, 2015 – [Trovita Health Science](#) – makers of [ENU®](#), an innovative, high protein and high calorie complete nutrition shake – announce the partial closing of a convertible note investment offering through [CircleUp](#), a leading crowd funding platform. Trovita has secured \$310,000 in additional capital and is accepting up to \$1 million total investment in the on-going convertible note round for accredited investors.

Trovita will employ the new capital to further the continued growth of the company's flagship brand ENU, and to launch a new patent-pending product for enteral nutrition called Ultrient™, anticipated to launch in 2016.

Ultrient is a combination tube feeding [delivery system](#) – utilizing the new EnFit® nutrition connection system – and a proprietary complete nutrition formula for enteral feeding. The innovative delivery system is a single-serve, pre-filled pouch, acting as a closed feeding system and allowing for fast and portable administration of bolus feeding formulas, without the worry of added risk of food contamination from bacterial exposure.

Will Brown, CEO at Trovita Health Science noted, “We are pleased that investors recognize the innovation Trovita is delivering in the \$10 billion global enteral nutrition market. Trovita's significant quality improvements in the nutrition formulas that medical professionals can now recommend to patients to minimize sugar intake is crucial to addressing the serious public health concerns in clinical nutrition. Combined with our forthcoming major innovation in the administration of tube feeding formulas, Trovita Health Science is determined to improve the lives of patients and caregivers, which will drive continued revenue growth and expansion for our shareholders.”

About Trovita Health Science

Trovita Health Science is an emerging specialty health and nutrition company, dedicated to developing and commercializing products that address unmet needs in clinical and sports nutrition. Trovita is recognized for innovation in the adult and sports nutrition categories, and was named a Division Winner in the 2014 Minnesota Cup, while ENU was also selected as the 2014 CPG Editor's Choice Award Winner for the best new innovation in weight management products. ENU is certified by Informed-Choice and has been verified through laboratory testing as being free of all banned substances. ENU is trusted for use in sport.
